

The Boon Dock Ranch & Sawmill Custom Cut Lumber

3398 St. Hwy 315

Owner:

David Aguilar

903-263-9811

Services offered:

- 1) Custom sawn lumber...turn your trees into dimensional lumber as per your specs.
- 2) Timber sales...we will try to find a market for your trees if dimension lumber is not needed.
- 3) Dead tree removal...we will remove dead or dying trees from your house lot or forested stands of timber free of charge, limiting the spread of insects or disease in addition to reducing the amount of fuel load to feed a forest fire. We have the expectation of removing the trees before the beetles vacate it and spread to the next tree, with an absolute minimum amount of impact to your stand of trees. We try like heck to use the beetle larva to catch fish .
- 4) Help both small and large tract landowners to build a home without a mortgage. We have a network of professionals who would help in the design and blueprints, as well as having the wood treated if required.
- 5) Select and Number 1 grade lumber...on many occasions we have top quality wood cured or curing available for purchase and also offer to plane the wood for an additional fee.
- 6) Our Sawmills are portable and can be set up on your land to process your trees, or the trees can be brought to our mill here in Carthage for processing.
