

# VAC 100

## Vacuum Coater

### for Water-Borne Coatings

#### Features:

- ▷ No loss of material to over spray
- ▷ Waterborne materials
- ▷ Easy set up
- ▷ 360 degree coating capability
- ▷ 20 liter reservoir

#### Affordable Technology

The Vacumizer 100 was designed for big and small productions. It can process stain, primer and top coats. Line speeds of up to 100 fpm.

#### 100% Efficiency

The Vacumizer is ideal for moulding and lineal stock with a consistent profile. The system is designed for maximum efficiency. The mill thickness can be accurately adjusted and the patented shroud allows for selective coating. This machine will save you money in coating costs in a very short time.

#### Designed for Flexibility

The vacumizer can be expanded with conveyors and other accessories to fit specific production needs. A double fluid filter system is available. The machine can also be combined with our gas fired infrared oven. Environmentally friendly, the vacumizer uses only waterborne coatings.

Type	VAC 100
Profile width	upt to 160 mm
Profile height	upt to 60 mm
Minimum Profile length	500 mm
Line speed	upt to 30 m/min
