

Advanced Lumber Drying Workshop

March 11, 2015
9:30 AM to 3:30 PM
Structural Modulars Inc.
101 Southern Avenue
Strattanville, Pa 16258
(In Clarion County)

Speakers include:

Dennis Clay, who will give an in-depth presentation regarding a new method of using your kilns to dry lumber that will not only save on energy costs but will also produce high quality lumber. He calls the method Alternate Heat/Dump Cycle (AHDC). In addition there will be a representative from a company that is currently using this technique to give their perspective on the effectiveness of using AHDC in their own drying process.

L&E Stover Enterprises will also be on hand to provide information about data that they have collected inside of commercial kilns that will help participants understand exactly what is happening in their kilns in regards to air flow, dry bulb and wet bulb temperatures, relative humidity, etc. The information that they have collected work hand in hand with AHDC.

At the end of the workshop there are plans to offer a kiln clinic where participants can ask questions about any issues they are having in their own operations such as lumber quality issues, maintenance problems, etc.

Contact Scott Weikert at 814-755-3544 or by email at sjw128@psu.edu for more information

This publication is available in alternative media on request. Penn State is committed to affirmative action, equal opportunity, and the diversity of its workforce.
