

FT-40 and FT-140

These two After-Filters are designed for use for applications involving large volumes of very fine dust. Particles as small as 0.3 microns are removed.

Polluted air enters the top chamber, is filtered by forty cloth filter tubes and the collected dust is stored in the bottom chamber. Clean air is released into the work area. Dust may be removed from either end of the bin.

FT-40 . . . For use with 3000 series and smaller DUSTKOPS. Cloth filtering area 383 square feet. Dust storage capacity 14.8 cubic feet. Equipped with hand operated shaker. Electrically operated, manually controlled shaker available at extra cost. Available with hopper bottom, see illustration.

Shipped completely assembled.

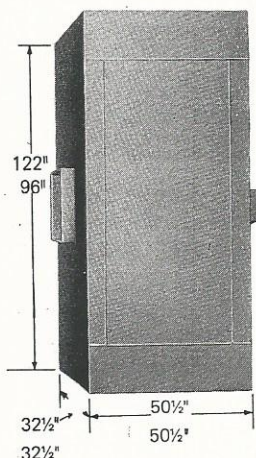

Shipping weight 575 lbs.

FT-140 . . . For use with 2000 series and smaller DUSTKOPS. This is a small version of the FT-40. Cloth tube filtering area 272 square feet. Dust storage capacity 14.8 cubic feet. Equipped with hand operated shaker. Electrically operated, manually controlled shaker available at extra cost.

Shipped completely assembled.

Shipping weight 550 lbs.

FT-40 and FT-140 WITH HOPPER BOTTOMS

FT-40 and FT-140 are available with hopper bottoms.

Shipped completely assembled.

Shipping weight:

FT-40 with hopper bottom 800 lbs.

FT-140 with hopper bottom 775 lbs.

FT-40 and FT-140 ENCLOSED WITH HOPPER BOTTOMS

For outdoor locations, outside venting, where permissible, from indoor locations, or circulating air into other plant area, where permissible.

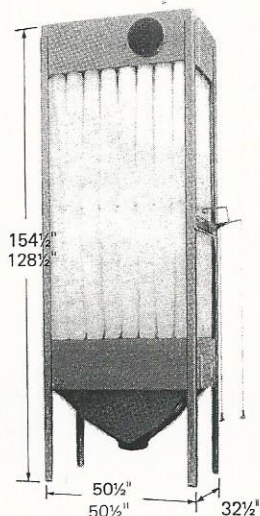

Where in-plant space is at a premium this enclosed version of the FT-40 and FT-140 can be placed outdoors and clean air piped back into plant. Completely weatherproof, when equipped with suitable outlet protector. Operates on the same principle as the FT-40 and FT-140. Collected dust is removed from hopper bottom through quick action gate. Cleaned air discharges from side opening. Available with hand or electrically operated shaker. Hopper Capacity 5.6 cu. ft.

Shipped completely assembled.

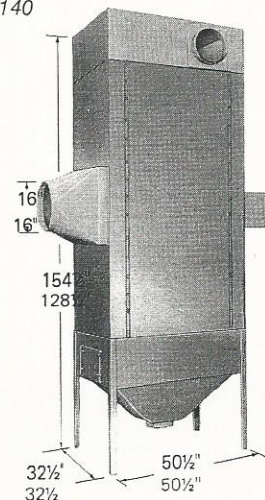

Shipping weight:

FT-40 enclosed with hopper bottom 970 lbs.

FT-140 enclosed with hopper bottom 835 lbs.
