

Resume

To whom it may concern,

I would like to thank you for taking the time to review my cover letter . I have acquired years of in-depth experience and knowledge in many categories in the premium architectural millwork industry. My seeking work preference is premium millwork installation or project management millwork related work.

As a project Manager I come from a very detailed mindset of experiences. I envision the whole project from an engineering design point, cost and budget, Timeline and schedule. This relates to how everything should be built to plans for jobsite installation simplicity. That mindset comes with only years of hands-on experience in the many phases and processes of the architectural millwork fabrication arena.

As an artisan millwork installer position. It ultimately gives me the self-satisfaction of my work skills being passed on and at the end of each day you see progress as everything comes together. I feel as though the millwork installation is the final statement of everyone's dedicated teamwork, when all is said and done is when the client is completely satisfied. Please reach out to me with any questions you may have.
